# Prismatic half-eye spectacles

## ■ BINO med S2

Prismatic half-eye spectacles with a pair of high addition lenses including prisms to support convergence for binocular close distance magnification.

- Spherical CR 39 lenses
- Metal frame in 2 colours in size 40-25, temple length 142 mm
- Supplied with protective case
- Made in Germany

BINO med S2 – silver metal frame

<b>IMP430160</b>	+3.00 D	<b>IMP460160</b>	+6.00 D
<b>IMP440160</b>	+4.00 D	<b>IMP470160</b>	+7.00 D
<b>IMP450160</b>	+5.00 D	<b>IMP480160</b>	+8.00 D

BINO med S2 – gold metal frame

<b>IMP430170</b>	+3.00 D	<b>IMP460170</b>	+6.00 D
<b>IMP440170</b>	+4.00 D	<b>IMP470170</b>	+7.00 D
<b>IMP450170</b>	+5.00 D	<b>IMP480170</b>	+8.00 D

## **BINO with Standard Halv-13**

Prisms to relieve convergence with increased near additions

For direct fitting and as a basis for testing and demonstrating the corresponding increased addition and magnification needs

Available in strengths +3.0 D to +16.0 D with corresponding prisms that support convergence

All BINO med standard loupes from +4.0 D are glazed with aspherical soft lenticular loupes made of CR39 and are always center thickness -optimized

Refinements such as edge/comfort filters possible

Available in Halv-13, Halv-14, Halv-15 and Halv-16 versions

Incl. AR+ (super anti-reflective coating, hard coat, clean coat and lotus)

The handy magnifying glasses for binocular care look like normal reading glasses, but are used when normal glasses are no longer sufficient. The advantage of a pair of magnifying glasses over a conventional magnifying glass is that the user has their hands free when reading, e.g. B. for operating smartphones or for sewing, handicrafts and manual work. Since the magnifying glasses are very light and unobtrusive, they can also be used on the go. The magnifying glasses are available in individual lens strengths. Furthermore, it can also be equipped with contrast-enhancing and protective filters (blue light/UV).

**frame colour:**

silver antique

**frame size:**

42-25

**frame material:**

Metal

**Compensation:**

AR+

**Diopter:**

from +3.0 to +16.0 possible as standard

also available as individual glazing

## **BINO with Standard Halv-14**

Magnifying glasses with convergence-supporting prisms for optically demanding care.

With optimized frame design and technical improvements.

Prisms to relieve convergence with increased near additions

For direct fitting and as a basis for testing and demonstrating the corresponding increased addition and magnification needs

Available in strengths +3.0 D to +16.0 D with corresponding prisms that support convergence

All BINO med standard loupes from +4.0 D are glazed with aspherical soft lenticular loupes made of CR39 and are always center thickness -optimized

Refinements such as edge/comfort filters possible

Available in Halv-13, Halv-14, Halv-15 and Halv-16 versions

Incl. AR+ (super anti-reflective coating, hard coat, clean coat and lotus)

### **frame colour:**

Transparent Anthrazit

Transparent Rot

**frame size:**

42-22

**frame material:**

plastic

**Compensation:**

AR+

**Diopter:**

from +3.0 to +16.0 possible as standard

also available as individual glazing

## **BINO with Standard Half-15 Metal**

Magnifying glasses with convergence-supporting prisms for optically demanding care.

With optimized frame design and technical improvements.

Prisms to relieve convergence with increased near additions

For direct fitting and as a basis for testing and demonstrating the corresponding increased addition and magnification needs

Available in strengths +3.0 D to +16.0 D with corresponding prisms that support convergence

All BINO med standard loupes from +4.0 D are glazed with aspherical soft lenticular loupes made of CR39 and are always center thickness -optimized

Refinements such as edge/comfort filters possible

Available in Halv-13, Halv-14, Halv-15 and Halv-16 versions

Incl. AR+ (super anti-reflective coating, hard coat, clean coat and lotus)

**frame colour:**

anthracite

Rot

**frame size:**

41-26

**frame material:**

Metal

**Compensation:**

AR+

**Diopter:**

from +3.0 to +16.0 possible as standard

also available as individual glazing

## **BINO with Standard Half-16**

Magnifying glasses with convergence-supporting prisms for optically demanding care.

With optimized frame design and technical improvements.

Prisms to relieve convergence with increased near additions

For direct fitting and as a basis for testing and demonstrating the corresponding increased addition and magnification needs

Available in strengths +3.0 D to +16.0 D with corresponding prisms that support convergence

All BINO med standard loupes from +4.0 D are glazed with aspherical soft lenticular loupes made of CR39 and are always center thickness -optimized

Refinements such as edge/comfort filters possible

Available in Halv-13, Halv-14, Halv-15 and Halv-16 versions

Incl. AR+ (super anti-reflective coating, hard coat, clean coat and lotus)

### **frame colour:**

Black, metal bracket

**frame size:**

41-27

**frame material:**

plastic, metal

**Compensation:**

AR+

**Diopter:**

from +3.0 to +16.0 possible as standard

also available as individual glazing
